What about this? Mostly taken from the OGC briefing paper we put together so I know Heidi, Lynn, et al are okay with language.

Subject: HIGH PRIORITY:: Action Item due Thurs Jan 26 at noon : Updating the Major Issues Template

Importance: High

Hi folks,

I sent a copy of this to Gayle earlier, but I am including her on this list because I think I have a little more information.

Attached is a copy of a spreadsheet on Major Issues in Region 10. It's a template of issues which are being used to brief landing teams in the region. What each entry in the spreadsheet is is a summary of a major issue (may include several potential actions that are similar) which is high profile and which Michelle needs to be aware of as we transition into the new administration. These are the 30K-ft summaries, not deep briefings—those are likely to come later—to make sure that Michelle is aware of the projects, has a sense of what the issues are, and is able to work with the new administration as things unfurl.

WE NEED YOUR HELP. What I would ask each of you is to take a look at the issues summarized in the spread sheet to ensure that the information is factual and up-to-date, and that it's a good short summary of what is involved. For Gayle, it's a mix of oil and gas issues; Matt, you have the biggest lift, because it includes Chuitna, Donlin and the elevation of issues in the AK District. Heather, the high tide line issue is summarized in the Washington issues at the bottom of the sheet, and Margo, you have Pebble in there. I have taken a look at all of them and the summaries seem OK, but you all are equipped to best identify whether they are up to date.

Can you let me know by tomorrow morning whether the entries are accurate? If they need updating, can

you edit in the spreadsheet in red text, and send it back to me? I have avoided doing this in Sharepoint because I need to compile for David and Linda, and they already have a Sharepoint version that they must update.

If you have any questions, please let me know, and thanks for your help with this.

Hi, please see below. Please send any updates to this table to David and me by noon on Thurs (please let us know what issues you've updated, added or deleted as we will need to cut and paste into sharepoint). In addition to updating the major issues list, Kendra will start scheduling briefings for Michelle for each of the major issues. We will also need to create more substantial briefing papers for Michelle in preparation for potential briefings in DC. Kendra will reach out to us about this and to get staff leads to start the process.

Subject: Updating the Major Issues Template

Hello Executive Team,

I am asking for your assistance in updating the Major Issues transition template that you and your staff helped put together back in August 2016. The material on the template will be useful for Michelle and Dan going forward but it is out-of-date and incomplete.

I am asking that you review the material currently on the template (which I will share with you here as an attachment) AND via OneDrive where you'll be able to edit. A couple of ground rules: 1) key contacts should be Office Director or Associate, 2) issues that have been resolved can be removed if no further action at Michelle and/or Dan's level is likely to occur, 3) add issues that are, or will become, important now into the future that will or could involve Michelle and/or Dan. Please keep your issue descriptions brief (short paragraph/6-8 sentences is fine).

Several issues that have already been vetted for inclusion on the template include: Yakima AOC, Navy/ex-Independence, multi-state offshore permit, Columbia River EIS. We realize there are likely more.

We'd like to have this template updated as quickly as possible...of course...but NLT next Friday, January 27th. I am available to assist you if there are issues with Sharepoint or questions about this request. Thanks in advance for your help, and we really appreciate all of the timely responses for the most recent 'asks' leading up to Inauguration Day and the weekend.

This OneDrive has been shared with R10-ET Mail Group.
